EXPERIENCE

Research & Strategy Intern | TiE Delhi-NCR Jun 2026 - Present

- Strengthened recurring revenue stream and minimized potential revenue leakage by designing an engagement-tracking system for a 138 member-club, enabling proactive identification of disengaged and at-risk memberships.
- Identified a gap in systematic member engagement monitoring through analysis of club member data, developed segments and data-driven outreach strategies to improve participation, retention, and community engagement.
- Developed a targeted startup sourcing strategy and structured database for TiE's flagship innovation challenge in partnership with Ericsson, identifying and segmenting 1,000+ potential startups to build a qualified pipeline aligned with program objectives.
- Conducted multi-sector startup ecosystem and funding analysis to assess company maturity and growth trajectories, structuring data on business models, industry classification, founders, funding rounds, grants, and BIRAC support to inform ecosystem analysis for the Director General.

Product & Project Analyst, Freelance | Independent Project Jun 2023 - Dec 2024

- Collaborated with a 5-member development team on a library productivity application used by **3–5** library staff members to streamline entries and records of books, journals, and other library materials.
- Contributed to defining product functionalities and UI/UX requirements, translating user needs and workflow challenges into product improvements.
- Identified usability trade-offs from extensive UI/UX enhancements and proposed a simplified **"Lite"** version of the application to prioritize ease of use and the core productivity objective.
- Coordinated project activities and Scrum meetings, tracking progress, identifying blockers, and facilitating communication across the development team.
- Developed the project pitch deck and presentation for an **ASU student startup competition**, contributing to the project being shortlisted for the subsequent round.

Research & Graduate Application Consultant, Freelance Apr 2020 - May 2023

- Conducted comparative research and analysis of Software Engineering Master's programs across U.S. universities, evaluating curriculum, faculty expertise, rankings, admission criteria, and overall program fit.
- Developed personalized university recommendations based on client profiles, academic background, career objectives, admission requirements, and financial considerations.
- Managed end-to-end application support, including documentation review, application strategy, and personalization of application materials to strengthen candidate positioning.
- Researched financial-aid, scholarship, and education-financing options to identify suitable funding pathways for clients.
