- Medium: Built a **40**+ article knowledge-repository on Medium, translating complex Excel, SQL, and financial modeling concepts into simplified, accessible insights for readers.
- Walmart Inventory Analytics: **Stockout flagging to prevent revenue-loss**| Excel Dashboard
- Cardio Good Fitness: **Analysing the dataset for Normal Distribution** | Excel
- Cardio Good Fitness: **Statistical Analysis and Customer Profiling** | Excel

RELEVANT EXPERIENCE

- **Financial Modeling & Valuation- Lenskart | Independent Personal Project** | Excel — *Sep 2026 - Present*

  Integrated three-statement model covering historical FY23-FY26 performance and projected FY27-FY31 results.

- **TiE Delhi-NCR | Shadow Intern | Research & Strategy** — *Jun 2026 - Aug 2026*
  - Strengthened recurring revenue stream and **minimized potential revenue leakage** by **developing a CRM-like engagement-tracking system** for a 138 member-club, enabling proactive identification of at-risk memberships.
  - Developed a structured database for TiE's flagship innovation challenge in partnership with Ericsson, identifying and segmenting 1,000+ potential startups aligned with program objectives, which served as the programme's **primary outreach database**.
  - Conducted multi-sector startup ecosystem and funding analysis to assess company maturity and growth trajectories, **structuring data** on business models, industry classification, founders, funding rounds, grants, and BIRAC support to inform ecosystem analysis for the Director General.

- **Independent Projects | Freelance | Product & Project Management** — *Apr 2020 - Dec 2024*
  - Collaborated with a 5-member development team on a library productivity application, contributing to **product functionality, UI/UX requirements, and workflow improvements** for managing library records and inventory.
  - Identified usability trade-offs from extensive UI/UX enhancements and proposed a simplified "**Lite**" version to prioritize ease of use and the application's core productivity objective.
  - Coordinated Scrum meetings, progress tracking, and ensured on-time blocker resolution.
  - Developed the project's **pitch deck** and presentation for an ASU student startup competition, contributing to the project being shortlisted for the subsequent round.
  - Conducted comparative research across U.S. Software Engineering Master's programs, evaluating curriculum, faculty expertise, rankings, admission criteria, program fit, and financial considerations to develop personalized recommendations based on client profiles.
  - Managed end-to-end graduate application support, including documentation review, application strategy, analysis of financial aids, and education-financing options to recommend suitable funding pathways for clients.

- **National Level Competitive Exam Preparation & Attempts** — *Jan 2017 - Mar 2020*

  Cleared SBI & IBPS Clerical and Probationary Officer Prelims 2019.
